

## WEET WMH Pure Aluminum Foil Capacitor In High End Crossover Blind Comparison

### WEET SAMPLES :

WMH Pure Aluminum Foil and Film Audio Capacitors, 3.3uF 100V +/-3% 20x77mm Axial RoHS

<https://www.musicaps.com/Uploads/PDF/WEET-WMH-Pure-Aluminum-Foil-and-Film-Audio-Capacitors.pdf>

**APPLICATION:** In High End Crossover

## TESTING RESULT:

A blind comparison of the effect on the sound of WEET WMH Pure Aluminum Foil Capacitor and Jantzen Alumen Z-Cap capacitors on two identical pairs of speakers (with careful selection of the element base according to parameters) was carried out with the participation of a group of fairly trained listeners who did not know which capacitor was in which pair. The capacitors were burned in 50 hours. A fairly large list of high-quality, multi-genre material was listened to.

Listening participants noted Jantzen Alumen's smoother, calmer delivery; WEET WMH sounded more contrasting, dynamic, more assertive, especially on rock. One of the participants expressed the opinion that WEET WHM is better combined with beryllium speakers (the beryllium Satori from SB Acoustics was used as the HF driver in the speakers being listened to).

WEET WHM was also noted to have a cleaner, more transparent sound. In the opinion of the participants, Jantzen Alumen did a little better in constructing the stage and plans.

We can definitely say that the WEET manufacturer managed to create a very high-quality, noteworthy capacitor with an excellent price/quality ratio.

Best regards,

From Alexander, Russia

## ABOUT WEET AUDIO CAPACITORS:

WEE Technology Company Limited is specialized in manufacturing MKP film and aluminium/copper foil audio capacitors for more than 20 years history. WEET adopt the key techniques from Taiwan factories and the main material are all imported from Japan and European countries. WEET pursuit the highest level in crossover audio circuit and we believe WEET is ready to compete with overseas brands. You deserve to have the best quality audio capacitors.
