APPLICATION: In High End Crossover

TESTING RESULT:

А н а т о л и й 5 м а р т а 2024, 21:04

Поставил фольгу WEET в ламповый предусилитель. Первые впечатления после 30 минут: звук куда более мясистый и наполненный, свободно льется, без напряжения по сравнению с пленкой довольно высокого класса, не говоря уж об электролите. Высокие пока не прорезались в достаточной степени, ну да такому конденсатору нужно часов 300 чтобы раскрыться. Изначально ставил электролит Elna Silmic, потом WIMA MKS, потом купил Audiodore Red Line, сейчас эти. Думаю это финальный вариант)

Anatolia, March 5, 2024, 21:04

Place the Weet aluminum foil in the preamplifier of the lamp. My first impression after 30 minutes: The sound is more fleshy, fuller, and smoother, with no pressure compared to quite high-end movies, let alone electrolytes. The high ones haven't been cut enough yet. Hmm, it takes 300 hours for such capacitors to open. Initially, he used Elna Silmic electrolyte, then Wima MKS, then Audiodore Red Line, and now these are the ones. I think this is the final version

Невероятный конденсатор, аж дух захватывает. Использовал в кроссовере на высоких частотах. На средних поставил fostex u-con из старого кроссовера. Пробовал на средних добавлять weet, но разницы с fostex не услышал. Старые технологии по прежнему используют в hi-end. А тут нормальная цена и качество hi-end. Очень рекомендую. Не обязательно весь кроссовер строить на этих конденсаторах, выйдет дорого, а на высоких частотах они идеальны.

Alexei, February 18, 2024, 18:17

Incredible capacitors, breathtaking. It is used for high-frequency crossover. Its feature is that the Fox U-Con has evolved from an old crossover. I have tried adding Weet at a moderate level, but did not hear any difference from Fostex. The old technology is still being used in Hi End. This is a normal price and high quality. Highly recommended. You don't have to build all the crosses on these capacitors, which would be expensive, and at high frequencies, they are perfect.

ABOUT WEET AUDIO CAPACITORS:

WEE Technology Company Limited is specialized in manufacturing MKP film and aluminium/copper foil audio capacitors for more than 20 years history. WEET adopt the key techniques from Taiwan factories and the main material are all imported from Japan and European countries. WEET pursuit the highest level in crossover audio circuit and we believe WEET is ready to compete with overseas brands. You deserve to have the best quality audio capacitors.
