APPLICATION: In High End Crossover

TESTING RESULT:

Here Is my expressions from WEET Cap WMO

First Of All, Big thanks to WEET Capacitor team for chance to get to WMO Cap - these guys are responsive, correct and friendly.

Now to the WMO capacitor. I purchased 2pcs WMO cap 4.7uF 250 Vdc which at size of 59 x 40 Is very compact. Order came safety packaged with nicely WMO bags for every capacitor. WMO Cap has a mark that point outer foil.

This Is my first meeting with copper foil caps. And ... I am very Impressed - specifically WMO cap Is very clear, detailed, transparent, fast, there Is no coloration. Sound Image Is not forward / In your face. WMO cap does very nice job In passages of recordings where things are complicated. WMO cap Is neutral and let you hear honestly at your sound chain - If there Is a weak spot you will hear that, If you got worst recording you will hear that.

At the moment I am only at about 100 - 120 Hrs of listening of WMO cap and I am pleased. Expect a tad more Improvement In region of 3D and dynamics. I am listening to my CD collection with excitement as I am hearing a new picture.

I recommend diy audio hobbyists to try WEET Capacitor WMO.

--- From Alex, Bulgaria

ABOUT WEET AUDIO CAPACITORS:

WEE Technology Company Limited is specialized in manufacturing MKP film and aluminium/copper foil audio capacitors for more than 20 years history. WEET adopt the key techniques from Taiwan factories and the main material are all imported from Japan and European counties. WEET pursuit the highest level in crossover audio circuit and we believe WEET is ready to compete with overseas brands. You deserve to have the best quality audio capacitors.
