WMH Pure Aluminum Foil and Film Audio Capacitors, 2 pcs, 2.2 μ F 100V +/-3% 17x58mm Axial RoHS

<https://www.musicaps.com/Uploads/PDF/WEET-WMH-Pure-Aluminum-Foil-and-Film-Audio-Capacitors.pdf>

APPLICATION: I need only 2 pcs of 2,2 mkf x 100volt for my 2way speakers

COMPARISON:

First of all, I was happy to buy your capacitors! I use these caps only for my tweeter.

In my tests there were the following components, So ,for me Very interesting to do these tests....

- Jupiter pure copper foil wax(high price)
- Jantzen - Amber - and Jantzen Alumen Z-Cap (Very costly !!)

TESTING RESULT:

I will test your aluminum and copper capacitors for 100 hours and write my opinion . I liked both types of WEET capacitors, both aluminum foil WMH and copper foil WMW for their sound neutrality.

Caps with aluminum foil WMH are an absolutely bargain!

Copper foil capacitors WMW create music with a great sense of realism, with a good balance between transparency and timbre.

Excellent ratio of sound performance to cost !

Undoubtedly ,these will find your rightful place along with Jupiter and Jantzen, which , however are much more expensive.

WEET Capacitors, Highly recommended !
